CF48 & MR5 WHEEL

■CF48

CF48 WHEEL

Unique in style and design, Mugen's one piece cast aluminum wheels use a fan cowl design to help direct air where it's most needed-your brakes. If you prefer the looks without the cowl, simply remove four small bolts with the tool provided. All Mugen wheels are hub-centric and have the correct offset for optimum handling and reliable performance. Also, because of their unique design and construction, Mugen wheels are among the lightest and strongest wheels available.

MR5 WHEEL

Spectacular styling and uncompromising quality are the key phrases used in describing the new Mugen MR-5 Wheel. This 2-piece modular wheel combines cast Aluminum rims with forged Aluminum centers for an extremely strong, yet incredibly light weight package. As with all Mugen wheels, the MR-5 wheel is hub-centric and has the correct offset for all HONDA/ACURA applications.
